

Municipal Services Duga Resa

Designed the digital platform for the Municipal services Duga Resa, focusing on creating a functional, easy-to-use interface for residents.

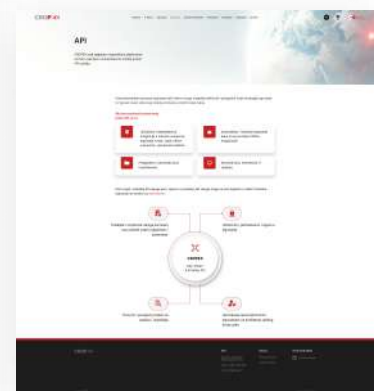

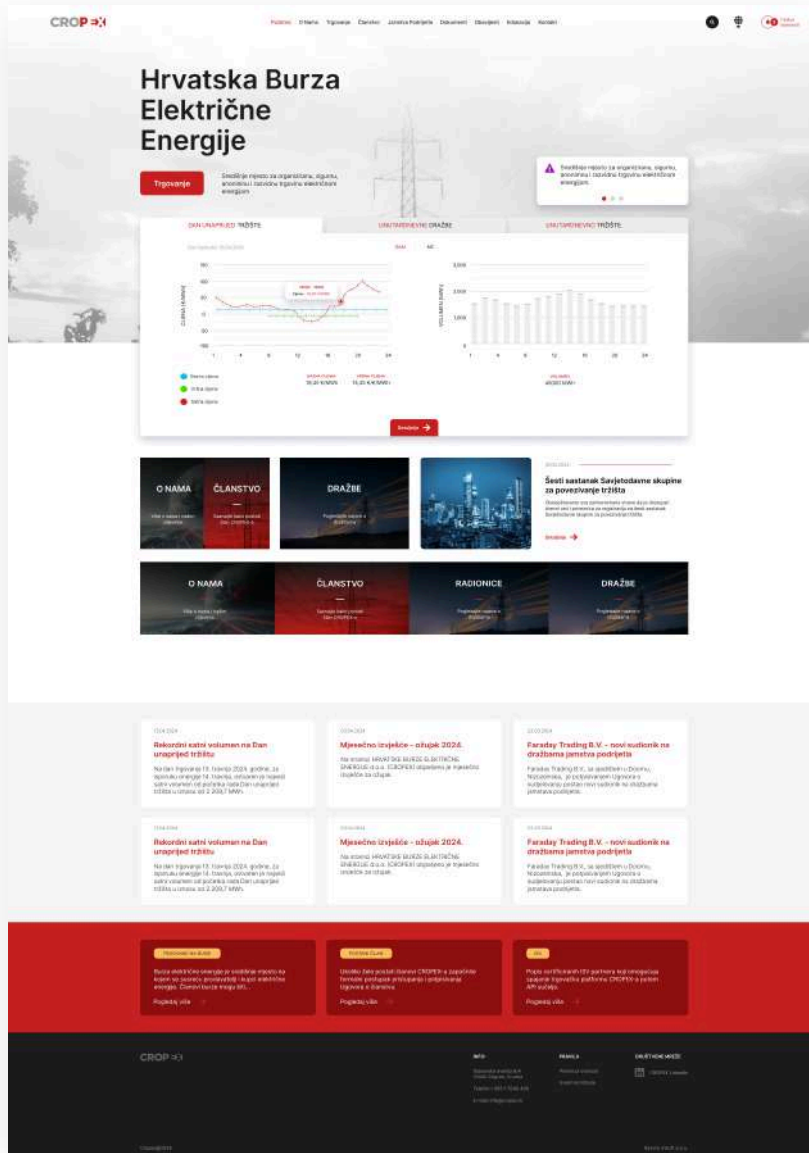

The project included creating a user-friendly interface that allowed residents to easily access information about public utilities, waste management, and other municipal services. I was responsible for the entire process—from user research, wireframing, and prototyping to final visual design. This site is currently in development.

WEBSITE

Cropex

Designed the entire website for the Croatian Power Exchange independently, including wireframes, user flows, and final high-fidelity designs. Created a seamless, user-friendly experience for power exchange stakeholders.

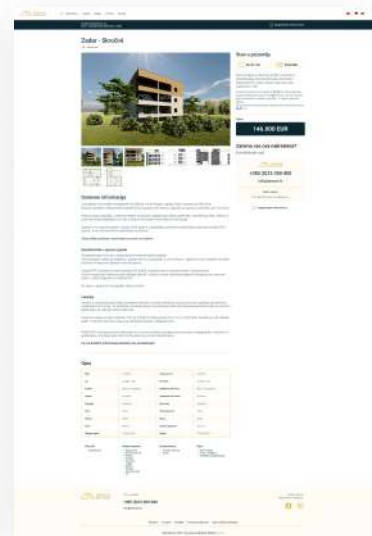

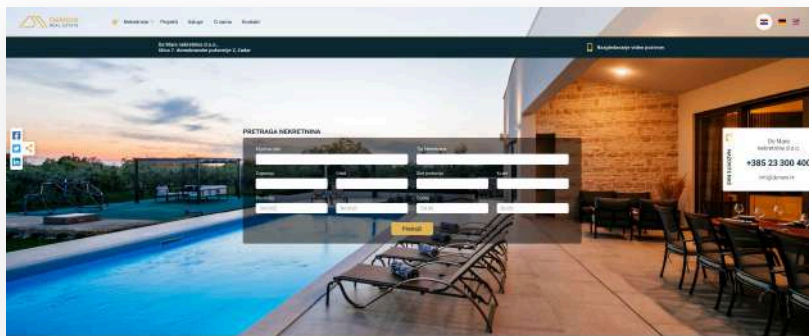

WEBSITE

DeMare Nekretnine

The project involved conducting user research, creating wireframes, prototypes, and delivering the final visual design.

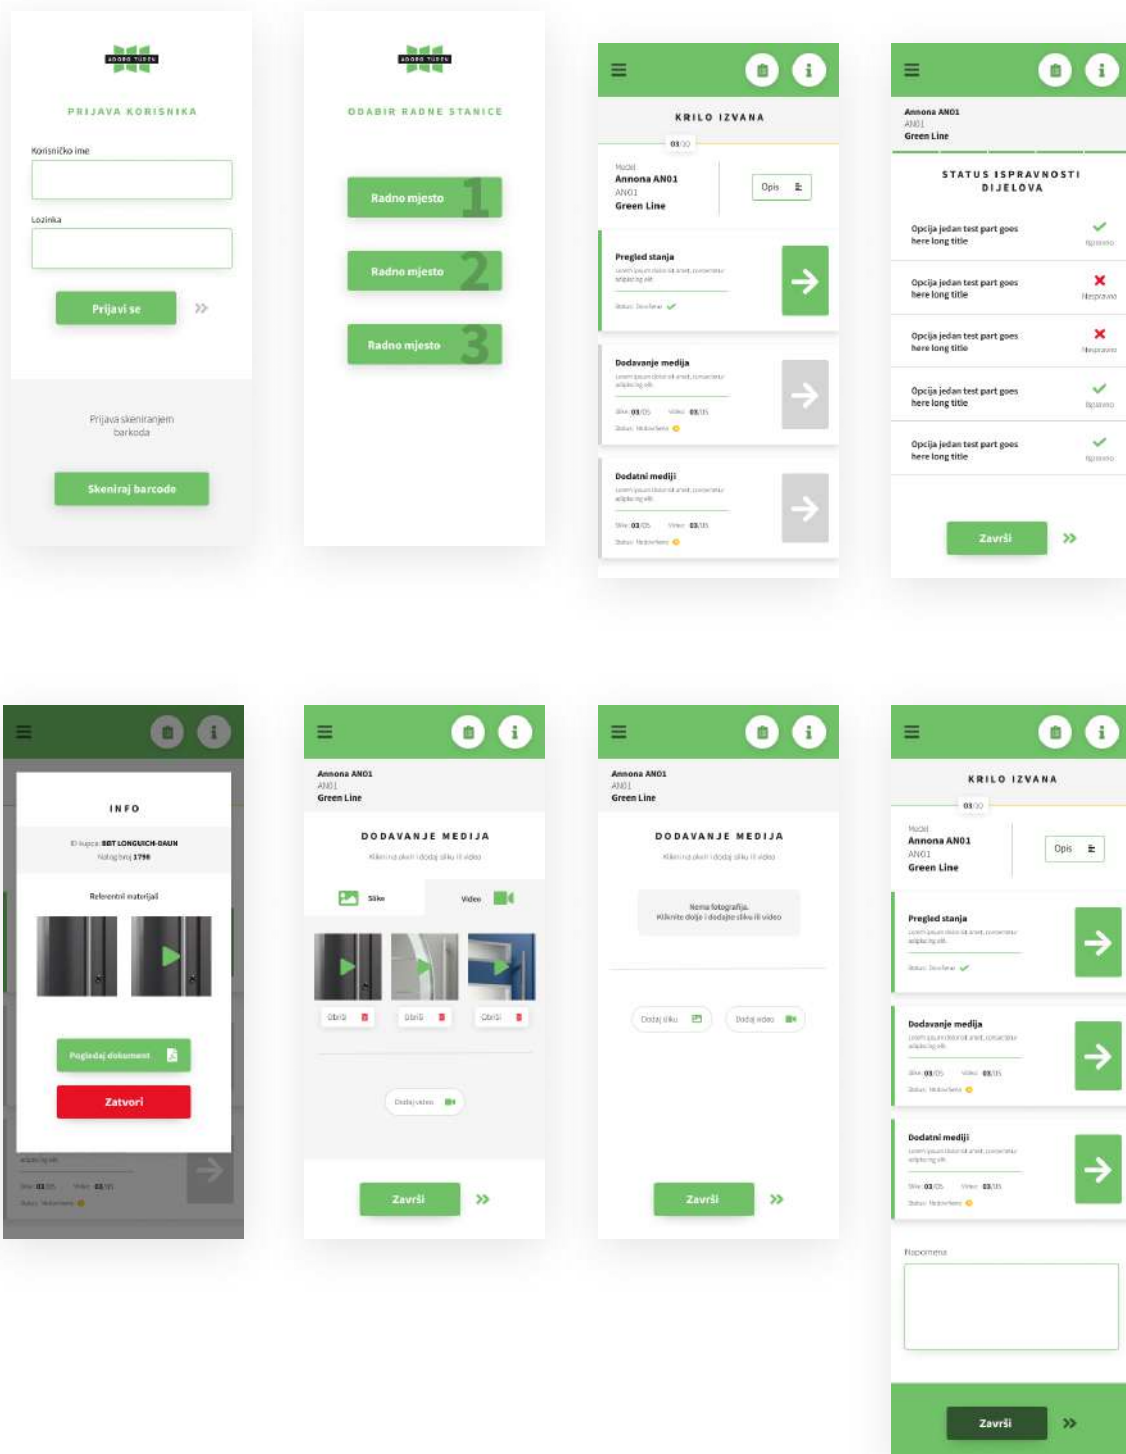

The primary goal was to craft a user-friendly interface that highlights the agency's property listings and services, making it easy for potential clients to navigate and explore. The design features a modern aesthetic, intuitive navigation, and a responsive layout to ensure excellent accessibility on all devices.

APP

Adoro Tueren

Designed a mobile application for Adoro Türen's assembly line workers. The app allows workers at each station to log in, create work orders, add media (videos/images) to the library, and perform quality inspections. Workers could identify faulty parts, log notes, or mark items as successfully inspected by pressing "finish." The app serves three stations, streamlining inspection and documentation, and improving workflow efficiency on the production floor.

WEBSITE

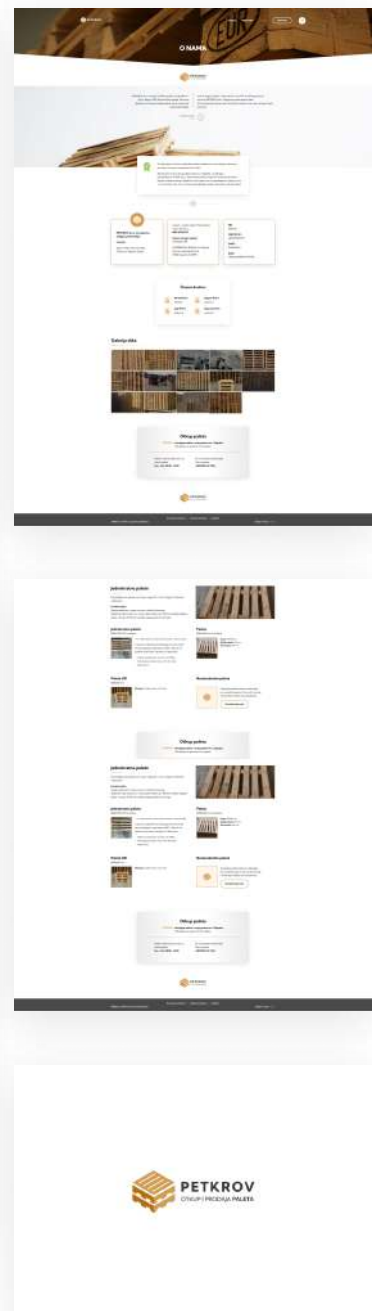

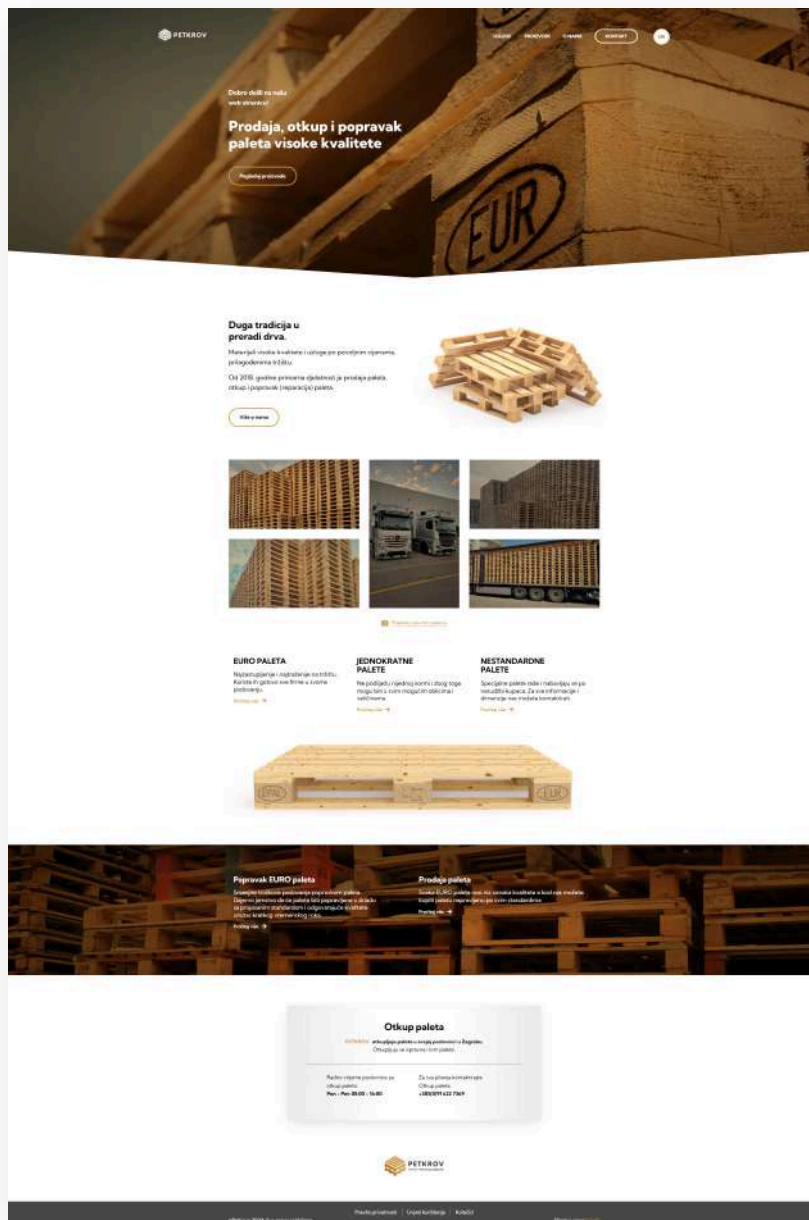

Petkrov

Website UX Design:

Focused on a clean, intuitive layout to enhance navigation and ensure a seamless browsing experience for customers. The design highlights key services, company values, and trust-building elements, such as testimonials and certifications.

Logo Design:

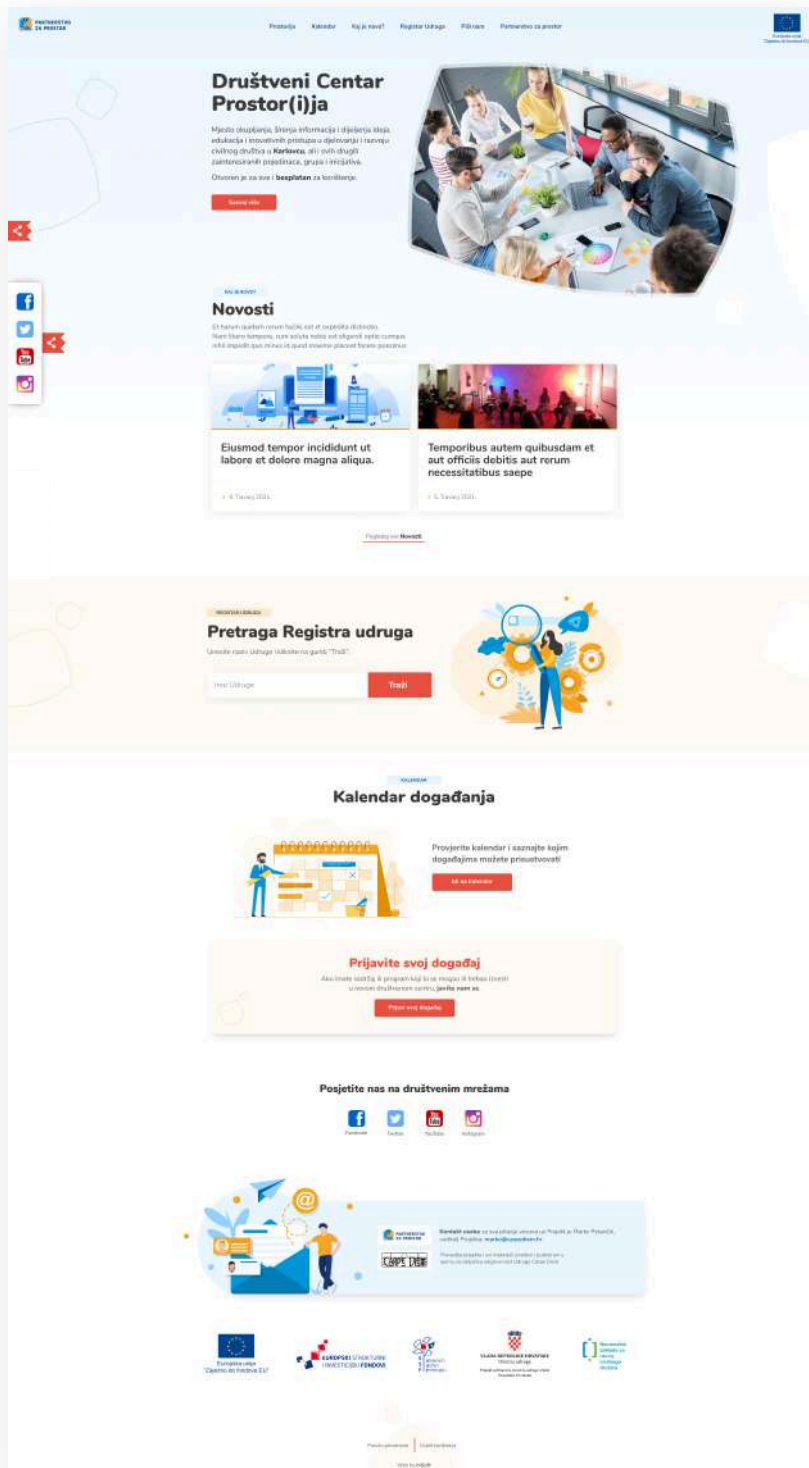

Created a sleek and modern logo that conveys professionalism and connects with the brand's identity in the roofing industry. The result is a cohesive brand experience that strengthens Petkrov's online presence and appeals to their target audience.

WEBSITE

Partnerstvo za Prostor

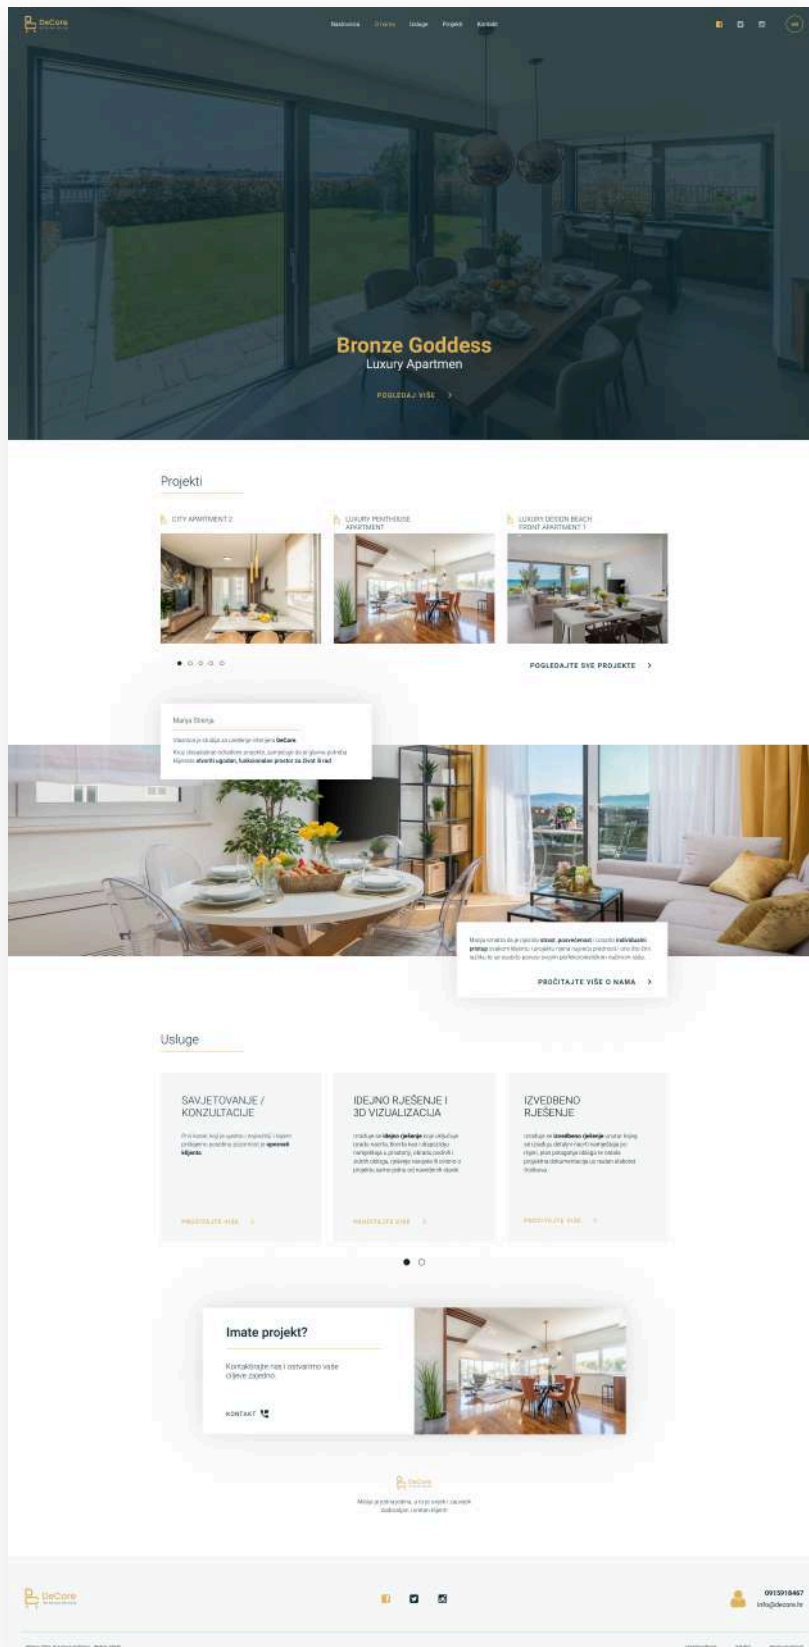

I was responsible for the UX web design of the Prostorija website, focusing on creating an intuitive and visually appealing user experience. My goal was to ensure easy navigation and accessibility, while maintaining a modern design that reflects the brand's identity

WEBSITE

Studio DeCore

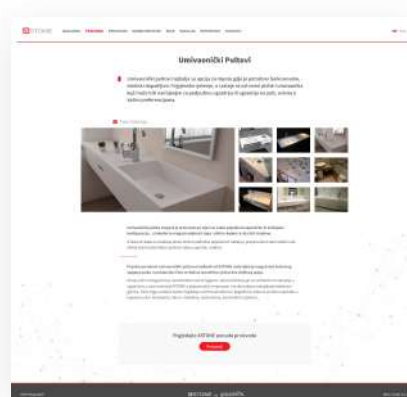

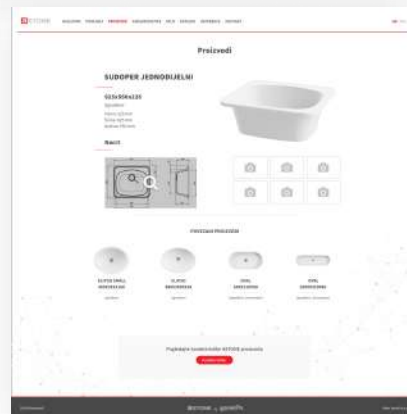

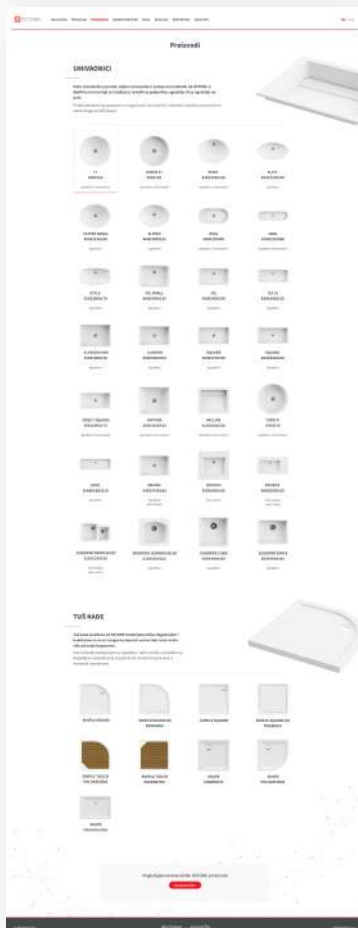

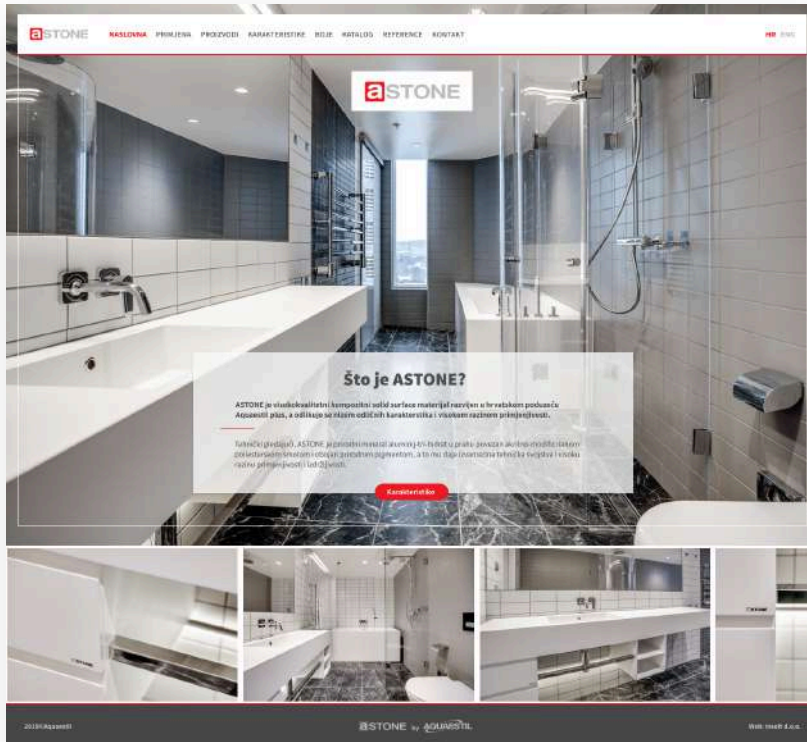

Designed the website for Studio Decore, an interior design firm specializing in 3D visualization and home staging. Managed the entire design process, including user research, wireframing, prototyping, and final visual design. Focused on creating a clean, modern, and user-friendly interface that effectively showcases the firm's portfolio and services. The design is fully responsive, ensuring optimal user experience across all devices.

WEBSITE

Astone

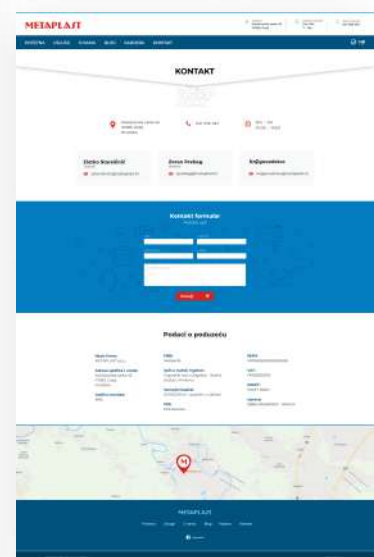

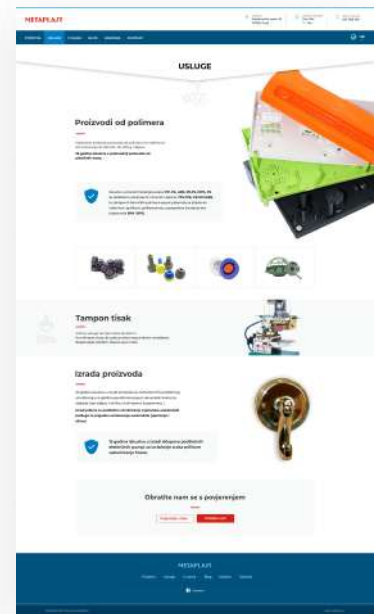

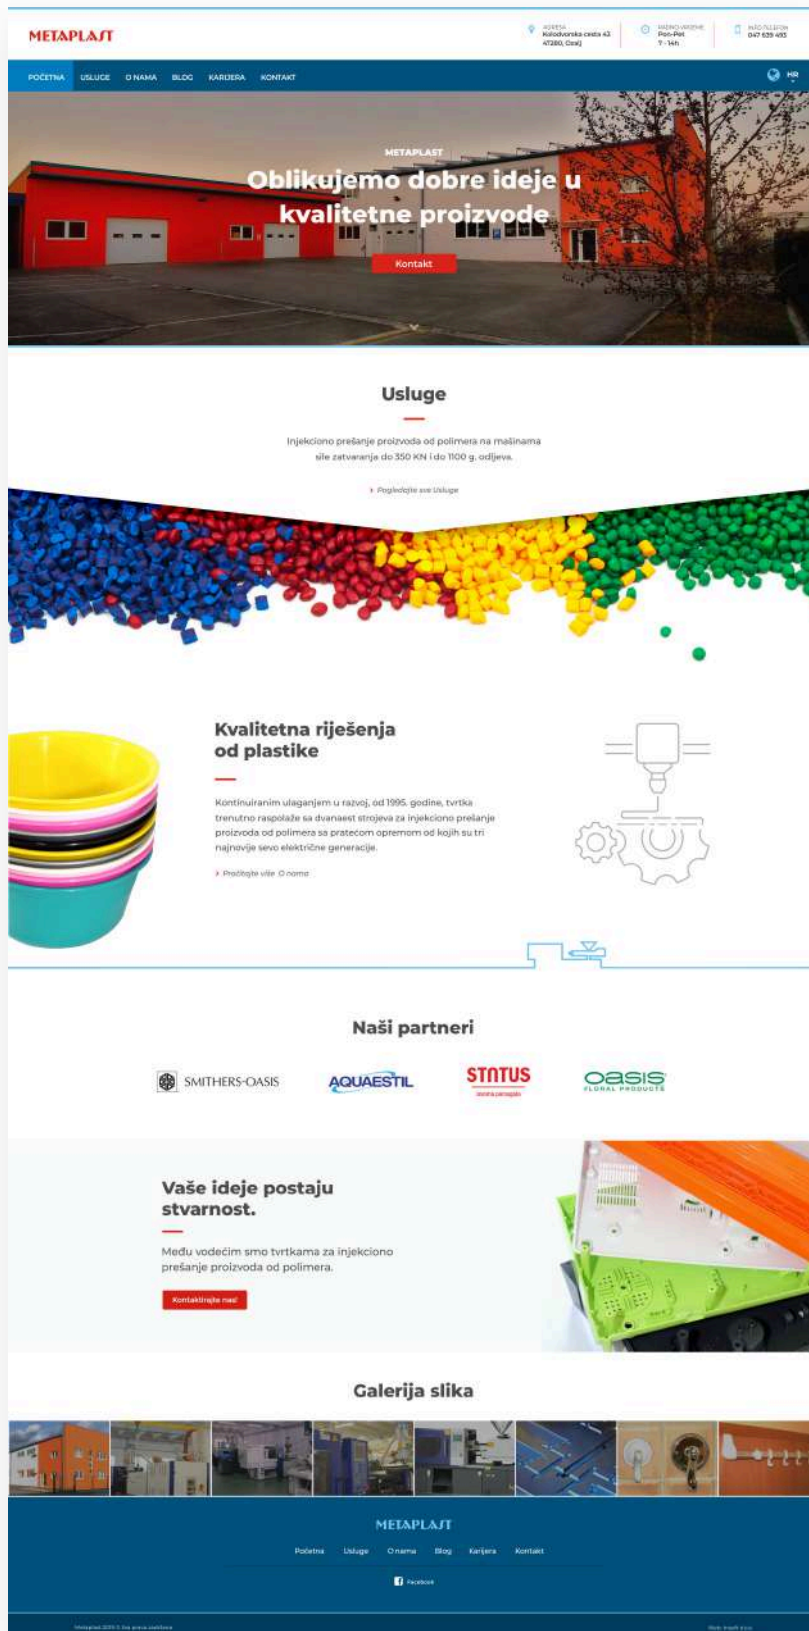

Designed the entire website for Astone, a high-quality composite solid surface material by Aquaestil Plus. Managed the design process from user research and wireframing to prototyping and final visual design. Focused on creating a user-friendly interface that effectively presents Astone's products and their applications. The design features a clean, modern aesthetic with intuitive navigation and responsive capabilities, ensuring optimal user experience on all devices.

WEBSITE

Metaplast

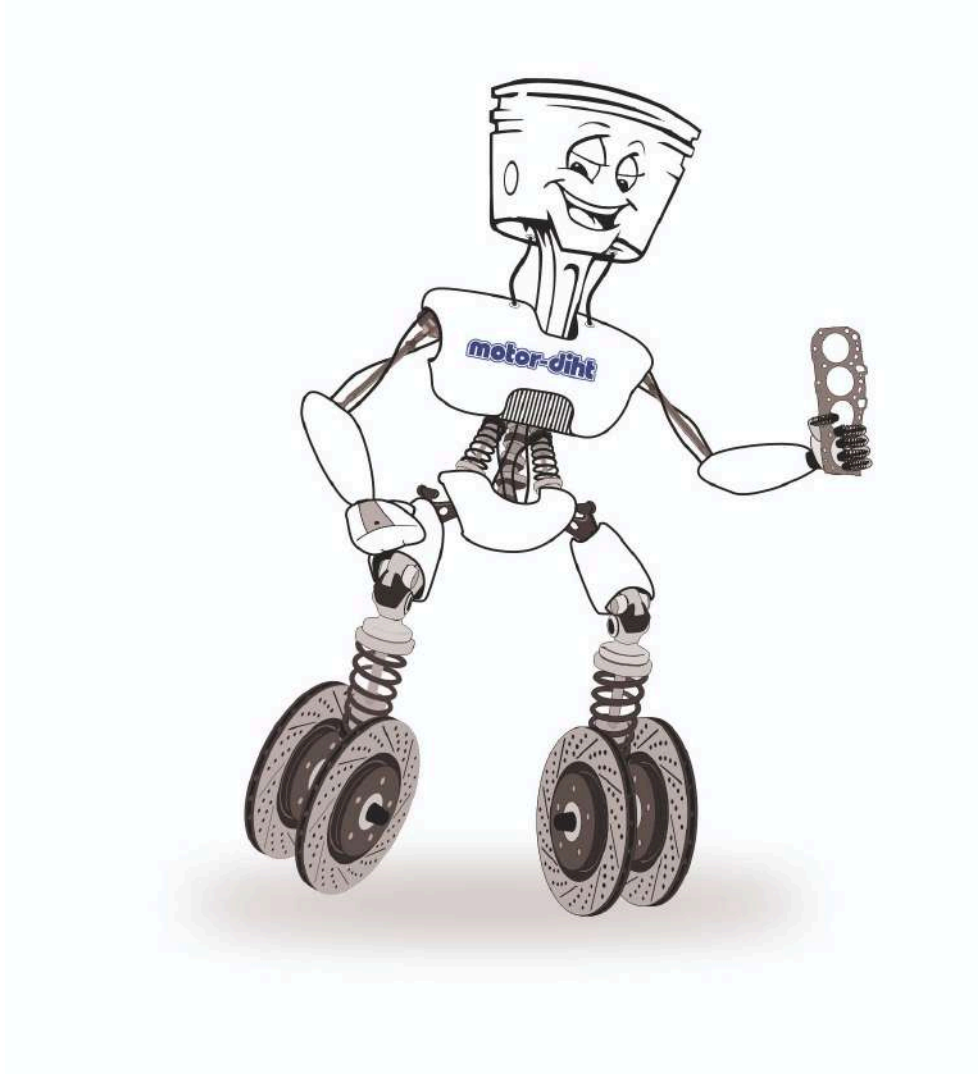

Designed the website for Metaplast, a Croatian company specializing in polymer injection molding. Managed the design process from wireframing to final visual design, focusing on showcasing Metaplast's services and expertise. Created a modern, user-friendly, and responsive design that emphasizes the company's capabilities.

CHARACTER DESIGN

Motor-Diht

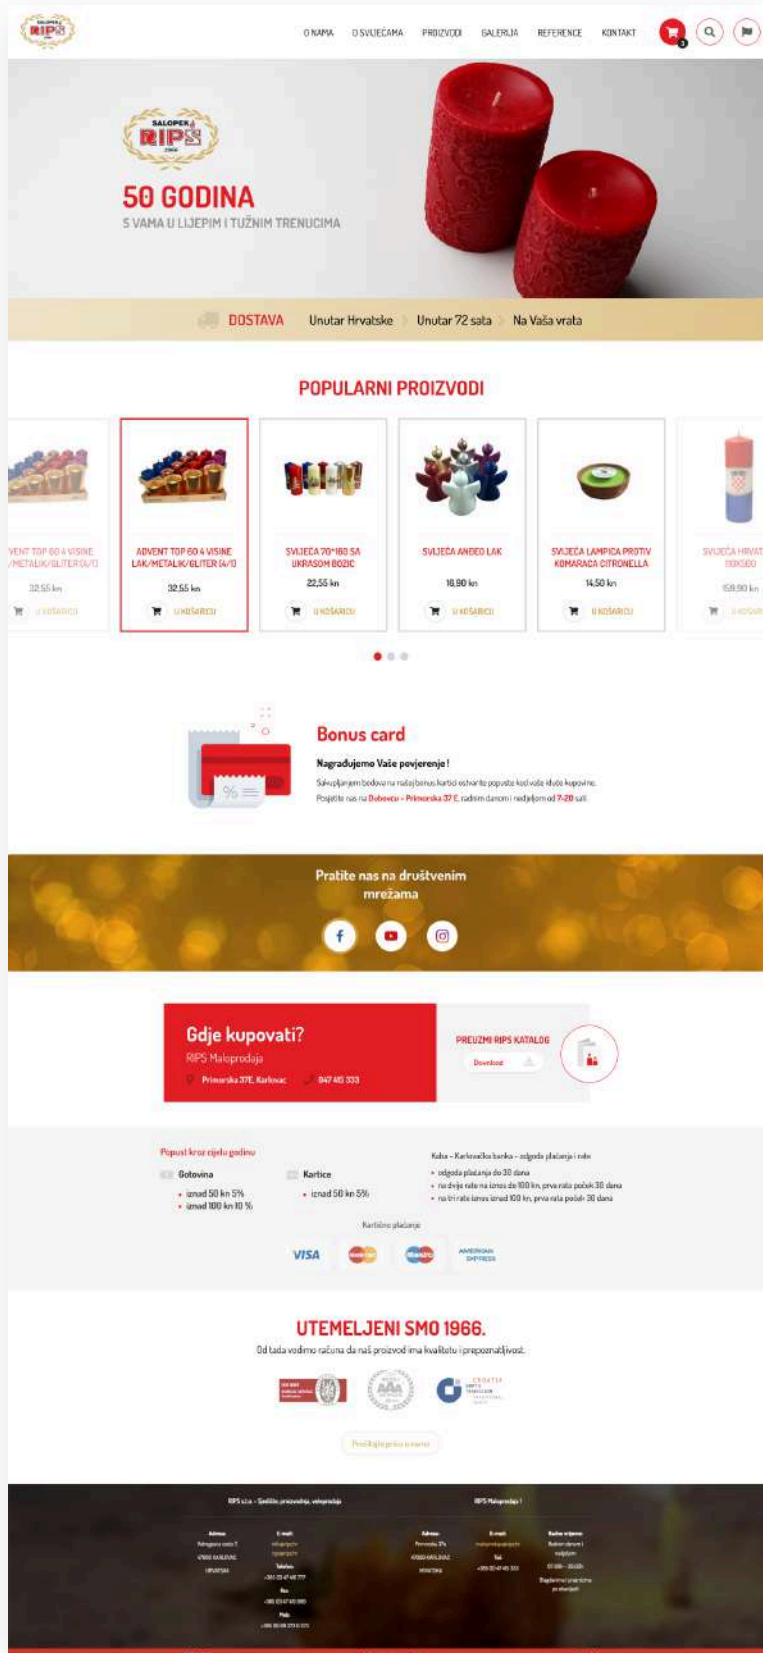

Created a custom character illustration for Motor-Diht, an automotive parts company. The character embodies the brand's theme, with visual elements inspired by engine components, making it memorable and engaging for customers.

WEBSITE

RiPS

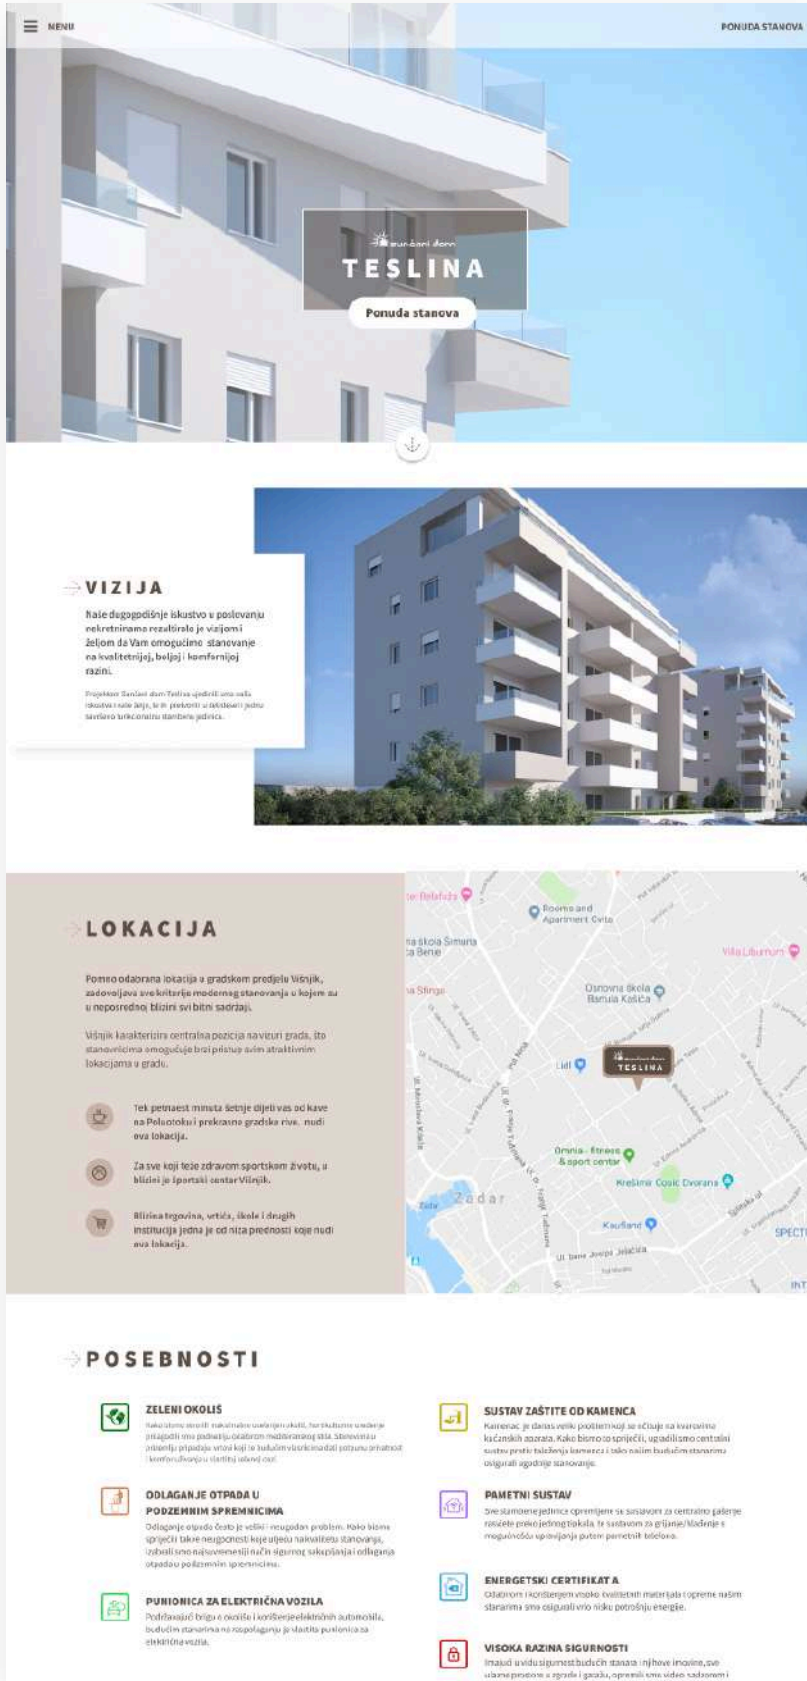

Led the redesign of RIPS.hr, a Croatian candle manufacturer's website. Managed user research, wireframing, prototyping, and visual design. The project focused on modernizing the site's appearance, improving e-commerce functionality, and creating a clean, responsive design to enhance user experience and accessibility across devices. Delivered a user-centric website that effectively supports product discovery and online sales.

WEBSITE

Teslina Apartments

Designed a website for the Teslina apartment building, located on Nikola Tesla Street. The project involved creating an appealing visual style to highlight the unique features of the apartments while maintaining ease of navigation for potential buyers and renters. I was responsible for wireframing, prototyping, and delivering the final visual design, focusing on presenting the modern aesthetic of the building.
